PDR RID Report

Originator	Hiroshi Watanabe	**Phone No**	**RID ID PDR** 125
Organization	ERSDAC (Japan, ASTER GDS)		**Review** FOS
E Mail Address			**Originator Ref** 001
Document	FOS PDR Day 2 - Volume 1		**Priority** 2

Section Real-Time Scenario   **Page**   **Figure Table**

Category Name Design   **Actionee**   HAIS

Sub Category

Subject   The real-time command operation from ASTER ICC

Description of Problem or Suggestion:

The real-time command operation from ASTER ICC should be clarified in the FOS PDR document.

Originator's Recommendation

We recommend to write, as written in PIP Vol. II, that ASTER ICC transmits command-mnemonics to EOC and that EOC checks and converts them into bit patterns for uplink.

GSFC Response by: **GSFC Response Date**

HAIS Response by: D. Herring   **HAIS Schedule**   2/17/95

HAIS R. E.   D. Dunn   **HAIS Response Date** 2/15/95

It was agreed between ECS, ASTER, and the AM-1 Project that ASTER would not require the capability to send real-time commands. Reference RID PDR # 25. Note that ASTER may request that the Flight Operations Team in the EOC send real time commands to ASTER in the event of an anomaly or special activity.
